Maryland Infectious Disease and Environmental Health Administration

MISSION

To improve the health of Marylanders by reducing the transmission of infectious diseases, helping impacted persons live longer, healthier lives and protecting individuals and communities from environmental health hazards.

We work in partnership with local health departments, providers, community based organizations and public and private sector agencies to provide public health leadership in the prevention, control, monitoring and treatment of infectious diseases and environmental health hazards.

Regional Summary

HIV/AIDS in the Eastern Region

- There were 756 living HIV cases at the end of 2008 and 52 reported HIV diagnoses during 2008
- Due to the reporting transition, living HIV cases may be low
- Wicomico County had the greatest share of cases (30%)
- Rates of living cases were higher in Dorchester and Wicomico than in the other counties

HIV/AIDS in the Eastern Region: Demographics

- Males were disproportionately affected (65% of cases vs. 49% of population), and the proportion male was increasing
- Non-Hispanic blacks were disproportionately affected (59% vs. 16%), but the proportion non-Hispanic black was decreasing while the proportion non-Hispanic white was increasing
- Persons 30-59 years old were disproportionately affected (79% vs. 40%), and proportions were increasing among 20-29 and 50+ year olds while decreasing among 30-49 year olds

HIV/AIDS in the Eastern Region: Transmission Risk

- Sexual transmission predominates (>72%)
 - Homosexual and heterosexual transmission among men
 - Heterosexual transmission among women
 - Male homosexual transmission proportion was increasing
 - Heterosexual transmission was decreasing
- Injection drug use was an important route of transmission (>23%), and proportion IDU was stable
